

# Jamming in Marlborough

## Marlborough Town Hall

**Sunday 28th October - 10:00am to 4:00pm**

Come and see the Raspberry Pi and other computers in action with digital making demonstrations and presentations.

Something for all the family: electronics, autonomous robots, time lapse and stop motion photography, home automation, robotic arms and much more.

Understand how easy it is to 'code' and to make fun projects using a low cost computer.

Get hands-on experience in one of the workshops and guarantee a space by pre-booking a session at the web site.

Already have a Raspberry Pi? Bring it along to show what you have been doing or to get advice.

Want to understand how digital technologies are affecting the workplace and society generally? Or just want some fun with computers?

Bring your friends and family and drop in for an hour or so to this free event at Marlborough Town Hall between 10:00am and 4:00pm on Sunday 28th October '18.
