

Jamming in Marlborough

Marlborough Town Hall

Sunday 4th March - 10:00am to 4:00pm

We are joining the Raspberry Pi 6th birthday celebrations with the first full Raspberry Jam in the Marlborough area.

Come and see the Raspberry Pi computer in action with digital making demonstrations and presentations.

Something for all the family: robotics, time lapse and stop motion photography, home automation, and much more.

Understand how easy it is to 'code' and make fun projects using this low cost computer—and get hands-on experience of making and coding in one of the workshops.

Already have a Raspberry Pi? Bring it along to show what you have been doing or to get advice.

Want to understand how digital technologies are affecting the workplace and society generally? Or just want some fun with computers? Bring your friends and family and drop in for an hour or so at Marlborough Town Hall on Sunday 4th March '18.
